

# AYANDA LUTHULI

APPLICATION DEVELOPER & WORKFLOW  
AUTOMATION

## PROFESSIONAL SUMMARY

Application Developer with experience building and deploying internal automation systems used by 50+ employees in live business environments. Skilled in Google Apps Script, JavaScript, and Google Workspace tools, with a strong foundation in Java, SQL, and web development technologies. Proven ability to develop practical, production-ready solutions that improve workflow efficiency and data management. I have a Diploma in ICT (Application Development) graduate with hands-on experience in both academic and real-world systems.

## EXPERIENCE

**Workflow Automation & GenAI Support**  
**SIGNA GROUP – JOHANNESBURG, SOUTH AFRICA**  
**FEB 2026 – PRESENT**

- Developed and deployed 2 enterprise web applications using Google Apps Script, JavaScript, HTML, CSS, and Google Workspace technologies.
- Built production systems used by 50+ employees, automating business workflows, data collection, and operational reporting.
- Integrated Google Forms, Sheets, Drive, and Gmail APIs to streamline data processing and reduce manual administrative tasks.
- Collaborated with business users to gather requirements, troubleshoot issues, and continuously improve live production applications.
- Designed and maintained enterprise solutions, including an AI Adoption Platform and a Finance Transaction Engine, supporting workflow automation and reporting.

## PROJECTS

### AI Adoption & Workflow Analytics Platform

Designed and deployed an internal enterprise application using Google Apps Script, JavaScript, HTML, CSS, and Google Sheets to collect AI usage, workflow feedback, and operational insights.

### AI-POWERED SMME FUNDING APPLICATION MATCHER

Developed a web application that matches small businesses with suitable funding opportunities using AI-assisted matching logic and Supabase (PostgreSQL) for data management and application tracking.

### Hospital Management System

Developed a Java desktop application using Java Swing (JFrame) and SQL for managing patient, appointment, and staff records while applying object-oriented programming principles.

## TECHNICAL SKILLS

### Languages

- Java
- JavaScript
- SQL
- VB.NET
- HTML
- CSS

### Backend

- Google Apps Script
- OOP
- Workflow Automation
- Spring Boot (Learning)

### Databases

- MySQL
- PostgreSQL (Supabase)

### Tools

- GitHub
- IntelliJ IDEA
- VS Code
- Google Workspace

## EDUCATION

**DIPLOMA IN ICT (APPLICATION DEVELOPMENT)**

**WALTER SISULU UNIVERSITY | 2023–2025**

### NATIONAL SENIOR CERTIFICATE

Phoenix College | 2022

### ACHIEVEMENTS

- Top 10 Finalist – FNB App of the Year 2025
- SATNAC Hackathon 2025
- IDZ Innovation Challenge 2025
